CONTEXT + PERSONA
Authored persona + social state + acknowledged history
Identity, duties, relationships
Interaction snapshot
Trusted facts + revision
GAME INTERACTION / DELIVERY
Game / player interaction
Skyrim connector or local lab
Adapter boundary
Input mapping / correlated receipts / memory acknowledgement
Validated NPC output
Text / supported audio command
ONLINE INTERACTION
Context appraisal
Engagement / route selection
ORCHESTRATION
PreviewRunner: request / retrieval coordination
Deadlines; cancellation; revisions
Context + prompt construction
Whole evidence; bounded history; byte cap
Validation / one bounded repair
Modes, length, IDs, revisions
Validated fallback
MODEL ABSTRACTION
ModelProvider contract
Compatible HTTP inference endpoint
ProviderReply normalization
Text, finish reason, usage, model
KNOWLEDGE RETRIEVAL
Online scoped retrieval
CPU query embedding + Chroma
One-file source binding / evidence recheck
Persistent vectors + manifest
Committed source revisions
OFFLINE KNOWLEDGE PREPARATION (NO GENERATOR TRAINING)
Game-specific documents
Extraction + token chunking
CPU MiniLM embeddings
data / evidence
control / optional work
Visual reference remains untrusted data
